Things to Know about Getting a Mammogram

- Don't use deodorant or antiperspirant, powder, or cream under your arms. They may interfere with the quality of the mammogram.
- Wear a two-piece outfit. That way you only need to take off your top. The facility will provide a wrap for you to wear.
- Try to have your mammogram at the same facility each year, if possible. If not, bring copies of your old mammograms for comparison.
- The breast compression may cause some temporary discomfort. Tell the technologist if you experience pain during the procedure.
